

# LiftSafe<sup>®</sup>

## Maintenance Management Program

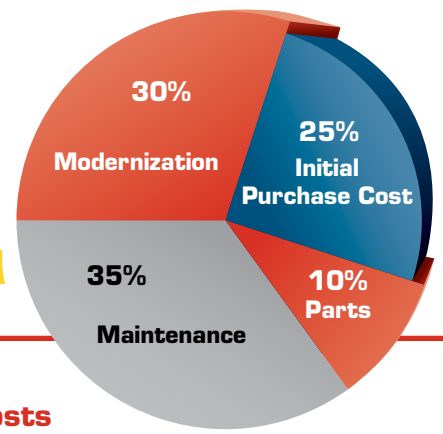

**LiftTech<sup>™</sup> introduces LiftSafe<sup>®</sup>, a systematic single-source approach to maintenance planning for increased safety and reliability.**

LiftSafe is a multi-point maintenance management program based on the principles of mechanical integrity and supported by industry experts to establish, monitor and maintain a complete range of equipment and devices.

**LiftSafe provides support through:**

- Equipment Identification & Classification
- Documented Procedures
- Employee Training
- Testing & Inspection
- Correction of Deficiencies
- Quality Assurance

## LiftSafe® – Maintenance Management Program for:

- Improved Safety
- Reduced Liability
- Consistent Reliability
- Reduced Operating Costs

LiftSafe is a proven method in reducing operational costs while assuring the reliability of equipment and devices.

### Total Lifecycle Costs

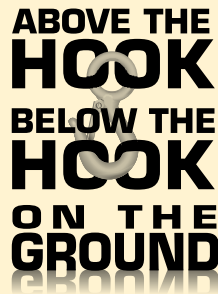

35% of the lifecycle costs can be attributed to planned maintenance as well as emergency and ongoing repair costs, while parts, modernization and the initial purchase price account for the balance. LiftTech Industrial Service's representatives can detect safety and production hazards and therefore can help you avoid the high cost of unscheduled downtime.

### Step Up With LiftSafe®

LiftTech's LiftSafe Maintenance Management Program is your facility's primary tool for avoiding costs before they occur. When your equipment is operating reliably and efficiently, your entire facility takes a step up toward achieving its full potential with:

- Increased uptime and production capacity
- Enhanced safety environment
- Clearly defined maintenance tasks
- Less reliance on costly spares
- Greater production capacity
- Reduced liability

LiftTech looks beyond equipment inspections to establish an integrated preventative maintenance systems-based process for continuous improvement throughout your facility.

### One Plan, One Source

LiftTech is uniquely equipped to deliver the industry's first end-to-end, systematic approach to reliability solutions.

Our programs are based on structured, integrated methodologies and procedures devoted to strengthen and lengthen the service life of all of your material handling applications, assemblies, components, equipment and devices such as:

- **Above-the-hook:** Cranes and crane components
- **Below-the-hook:** Mechanical and magnetic lifting devices
- **On-the-ground:** Surface mounted and mobile equipment

Our end-to-end approach allows us to allocate resources and synchronize tasks to keep the service costs at a minimum while we significantly reduce the impact of failed or compromised devices on your bottom line.

### Improving Processes With INTEGRITY

LiftTech's service specialists are available to provide complimentary LiftSafe® presentations on the principles and practices of Mechanical Integrity to your staff.

**Ask for details!**

### Customers rely on LiftTech where safety and reliability count:

- |                      |                     |                    |                     |                  |
|----------------------|---------------------|--------------------|---------------------|------------------|
| • Alternative Energy | • Equipment Dealers | • Oil & Gas        | • Scrap & Recycling | • Transportation |
| • Automotive         | • Manufacturing     | • Port Authorities | • Shipbuilding      | • Warehousing    |
| • Construction       | • Metal Producers   | • Pulp & Paper     | • Steel Service     | • Waste Handling |

### Accredited end-to-end service

LiftTech personnel are certified and/or adhere to all applicable industry standards.
